INFLUENZA SITUATION SUMMARY

Executive Summary

The Medical and Health Coordination Center (MHCC) remains activated at Level 3 (low) to compile and update information related to influenza from a variety of sources and coordinate response activities across California Department of Public Health (CDPH) Centers and Programs.

California continues to see widespread levels of influenza and influenza-like illnesses (ILI) with hospitalizations above expected levels, as reported on 02/02/18. Updated influenza data is released by the CDPH Center for Infectious Diseases (CID) each Friday. During Week 4 (01/21/18 – 01/27/18), CID reports there were thirty (30) laboratory confirmed influenza associated fatalities and thirty-four (34) laboratory confirmed influenza outbreaks. This is an increase of seven (7) fatalities and two (2) outbreaks from week 3. During the time period that CDPH has been monitoring seasonal influenza in 2018, there have been 127 laboratory confirmed influenza associated fatalities and 250 laboratory confirmed influenza outbreaks in people under the age of 65.

WEATHER OF CONCERN

Weather of Concern

- A Dense Fog Advisory has been issued for parts of the central San Joaquin Valley until 1100 hours. Visibilities of 200 feet or less can be expected in areas of dense fog.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

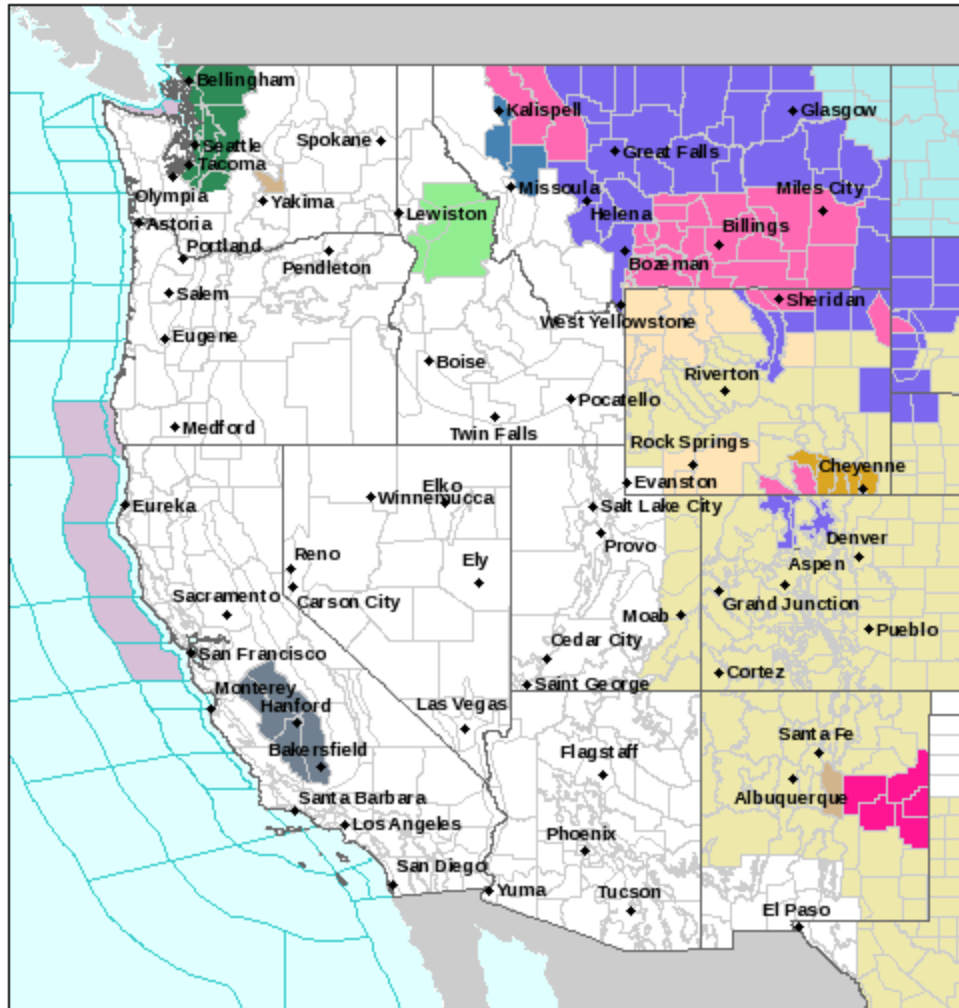

NORTHERN CALIFORNIA

High pressure remains through the weekend with dry conditions and unseasonable warmth persisting. Afternoon highs will run 15-20 degrees above average for early February, but overnight lows will still be chilly with lows in the 30s in western Nevada and 20s for Sierra valleys/colder valleys in western Nevada. Light winds will prevail through Sunday but should pick up Sunday night into Monday as a weak shortwave trough pushes through the Pacific Northwest. Wind gusts across the ridgetops could increase into the 40-50 mph range by Monday morning while valleys cloud see northwesterly winds with gusts around 25-30 mph. This will bring slightly warmer temperatures on Monday as mixing is enhanced due the increased winds. This system will mainly increase clouds with light precipitation remaining north and east of northwestern Nevada.

SOUTHERN CALIFORNIA

A strong upper level ridge of high pressure will remain anchored along the West coast for the next several days and bring a continuation of dry weather and well above normal afternoon temperatures to the regions interior. Patchy dense fog will occur in the San Joaquin Valley each night and morning through the period. This upper level ridge will bring a continuation of dry weather and Spring like afternoon temperatures to the CWA through at least next weekend.
